Overspeed protection

FEATURES:

1. PU material for front and rear wheel
2. Self-locking handle brake
3. Double folding frame
4. Resistance adjustment for safe speed-limited travel without electric power

Resistance is generated by a magnetic field to create resistance without the need for electric power. This technology can limit the speed of movement of the walker, provide stable support for the user, and assist the user to walk within the controllable speed range, and the faster the walking speed, the greater the resistance.

IYASOCARE®

Walking Aid

YSW7002

FEATURES:

1. Made of steel, it will not scratch the surface and never rust;
2. The height of the legs is adjustable in 8 gears and 8CM, which is suitable for different heights (there is a slight error due to different production batches);
3. The handle is made of high-density PVC material, which is non-slip and does not break;
4. Enlarged and thickened natural rubber foot pads are more durable and non-slip, and built-in metal gaskets enhance their durability;
5. When not in use, it is very convenient to fold and occupies a small area.

Instructions

1. Fold and open, and the middle marble pops out to fix;
2. Press the 4-leg marbles in turn, and adjust the 4 legs to the same appropriate height;
3. Hold the handle tightly and move forward alternately with the left hand and the right hand.
